PACSHORE TECH

# BENEFITS

- 100% natural
- Scratch-resistant
- Easy to clean
- UV-resistant
- Stain-resistant
- Frost-resistant
- Heat-resistant
- Non-porous

**VALUE**

**Pacshore Tech** offers quality and value, so you do not have to compromise the desired look for an affordable price.

**DURABILITY**

**Pacshore Tech** porcelain slabs are made by compacting materials such as clay, feldspar, kaolin, and quartz sands and then firing them at extremely high temperatures. This process creates a product that is even more durable than ordinary ceramic making it scratch, stain, heat, UV, and frost-resistant.

**HYGIENIC**

**Pacshore Tech** is manufactured to be hygienic and reduces the opportunity for bacteria, mold, and mildew to grow because the slabs are non-porous.

**FABRICATION GUIDELINES**

Leathered ● Polished ◆ Matte

# CLEANING & MAINTENANCE

**Pacshore Tech** is desirable because of its ease of maintenance. Porcelain cleans easily and does not stain. For regular cleaning, use a warm, damp, soapy cloth but for more stubborn marks, a simple sponge with stain remover will do the job. Although porcelain is non-porous and scratch-resistant, we do not recommend using steel wool pads or cleaning products with hydroflouric acid or its derivatives. The best way to ensure the impeccable status of your **Pacshore Tech** surface is to be diligent and clean up spills right away.

# SIZE & THICKNESS

**Pacshore Tech** porcelain slabs are 126” x 63” and available in 1.2 cm & 2 cm.

# SUGGESTED APPLICATIONS

- Countertops
- Flooring
- Wall cladding
- Shower surrounds
- Fireplace surrounds
- Backsplashes
- Islands
- Wainscotting
