

westedge DESIGN FAIR

October 2018

Quartzites and marbles from around the world were displayed in a booth designed to inspire and reveal the best of exotic stone. The event took place October 18-21 at The Barker Hangar in Santa Monica and offered attendees the opportunity to experience products from top-tier design brands in categories including furniture, lighting, kitchen and bath, and more.

Located close to the main entrance of the show, the Elements Room booth (#117) featured stunning bookmatch displays, with whole slabs lining the inside and outside of the booth. Designed to look like an art gallery, products on display included two quartzites new to the California market: Cristallo Tiffany and Cristallo Venato. Visitors to the booth were also be able to experience virtual reality tours of quarries in Brazil, to immerse them in the natural stone experience.

On day 1 of the show, Elements Room partnered with Luxe magazine to host an exclusive breakfast event. On Saturday afternoon, presentations were given at the booth featuring keynote guest speakers from Italy and Brazil. Antolini presented the innovative Azerocare, a revolutionary new technology that gives polished marble and onyx protection from etching and staining. Cocktails and appetizers were served during the presentations.
