

Dolomite Care Guide

PRESERVING THE BEAUTY OF NATURAL STONE

CARE GUIDE

DOLOMITE CARE GUIDE

Dolomite is a natural stone admired for its refined beauty, soft tones, and timeless appeal. Each slab has its own color, pattern, and texture.

DAILY CLEANING

Clean with warm water, mild dish soap, and a soft microfiber cloth. Dry with a clean towel. For deeper cleaning, use only pH-neutral stone cleaners.

WHAT TO AVOID

Avoid vinegar, lemon juice, bleach, ammonia, glass cleaners, bathroom cleaners, oven cleaners, strong degreasers, abrasive powders, steel wool, rough sponges, and acidic products.

Do not cut directly on dolomite or place hot items directly on the surface.

SPILLS & STAINS

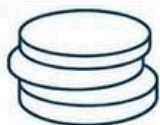

Clean spills immediately, especially wine, coffee, citrus juice, tomato sauce, oil, vinegar, alcohol, makeup, perfume, and colored liquids. Blot with a clean cloth.

Prompt cleanup helps preserve the stone's natural beauty.

SEALING

Dolomite should be sealed after installation and resealed as needed. To test the sealer, place water on the surface for 15 minutes. If the stone darkens, it may be time to reseal.

BEST PRACTICES

Use coasters, trays, cutting boards, and trivets. Protect edges, corners, seams, and sink cutouts.

With proper care, dolomite can remain beautiful for many years.

CARE GUIDE

DOLOMITE CARE GUIDE

Dolomite is a natural stone admired for its soft movement, elegant appearance, and timeless character. Each slab has unique variations in color, veining, and mineral composition.

For daily cleaning, use warm water, mild dish soap, or a pH-neutral stone cleaner and a soft microfiber cloth. Dry the surface with a clean towel to help preserve its appearance and minimize water spots.

Dolomite should be properly sealed after installation and resealed as needed. Sealing helps protect the stone and maintain its beauty; however, dolomite is not stain-proof, heat-proof, scratch-proof, or acid-proof. Use coasters, trivets, cutting boards, and avoid acidic products to help protect edges, seams, and sink cutouts from damage.

With gentle cleaning, quick spill removal, proper sealing, and daily protection, dolomite can preserve its natural elegance and beauty for years to come.

CARE ESSENTIALS

Preserve the natural beauty of dolomite

Maintain the finish you love

Use the right products

Care today for lasting performance

DAILY CLEANING

Clean with warm water, mild dish soap, and a soft microfiber cloth. Dry with a clean towel to help prevent water spots and cloudy residue. For deeper cleaning, use only pH-neutral stone cleaners.

WHAT TO AVOID

Avoid vinegar, lemon juice, bleach, ammonia, glass cleaners, bathroom cleaners, oven cleaners, strong degreasers, abrasive powders, steel wool, rough sponges, and acidic products.

Do not cut directly on the stone or place hot items directly

SEALING & PROTECTION

Dolomite should be sealed after installation and resealed as needed to help reduce absorption. However, sealing does not make dolomite stain-proof, heat-proof, scratch-proof, or acid-proof.

Use coasters, trays, cutting boards, and trivets. Protect

BEFORE YOU CLEAN

Before using any cleaning product, always make sure it is safe for dolomite or natural stone. Read labels and directions carefully, which can affect the surface finish.

When in doubt, follow the manufacturer's care instructions or contact a stone care
