

Onyx Care Guide

PRESERVING THE BEAUTY OF NATURAL STONE

CARE GUIDE

ONYX CARE GUIDE

Onyx is a natural stone admired for its beauty, translucency, and delicate elegance. Each slab has its own color, pattern, and texture.

DAILY CLEANING

Clean with warm water, mild dish soap, and a soft microfiber cloth. Dry with a clean towel. For deeper cleaning, use only pH-neutral stone cleaners.

WHAT TO AVOID

Avoid vinegar, lemon juice, bleach, ammonia, glass cleaners, bathroom cleaners, oven cleaners, strong degreasers, abrasive powders, steel wool, rough sponges, and acidic products.

Do not cut directly on onyx or place hot items directly on the surface.

SPILLS & STAINS

Clean spills immediately, especially wine, coffee, citrus juice, tomato sauce, oil, vinegar, alcohol, makeup, perfume, and colored liquids.

Blot with a clean cloth.

Prompt cleanup helps preserve the stone's natural beauty.

SEALING

Onyx should be sealed after installation and resealed as needed.

To test the sealer, place water on the surface for 5 minutes.

If the stone darkens, it may be time to reseal.

BEST PRACTICES

Use coasters, trays, cutting boards, and trivets.

Protect edges, corners, seams, and sink cut-outs.

With proper care, onyx can remain beautiful for many years.

CARE GUIDE

ONYX CARE GUIDE

Onyx is a natural stone admired for its beauty, translucency, and delicate elegance. Each slab has unique variations in color, pattern, and mineral composition.

For daily cleaning, use warm water, mild dish soap, or a pH-neutral stone cleaner and a soft microfiber cloth. Dry the surface with a clean towel to preserve its appearance and prevent water spots.

Onyx should be properly sealed after installation and resealed as needed. Sealing helps protect the stone and maintain its beauty; however, sealing does not make onyx stain-proof, heat-proof, scratch-proof, or acid-proof. Use coasters, trivets, cutting boards, and proper care to protect edges, corners, seams, and sink cutouts from strong impact.

With gentle cleaning, quick spill removal, proper sealing, and daily protection, onyx can preserve its natural elegance and beauty for generations.

CARE ESSENTIALS

Preserve the natural beauty of onyx

Maintain the finish you love

Use the right products

Care today for lasting performance

DAILY CLEANING

Onyx is not stain-resistant. Use warm water, mild dish soap, and a soft microfiber cloth. Wipe up spills immediately to help prevent water spots and cloudy residue. For deeper cleaning, use a pH-neutral stone cleaner.

WHAT TO AVOID

Avoid vinegar, lemon juice, bleach, ammonia, glass cleaners, bathroom cleaners, or abrasive scouring compounds. Avoidance products may dull or etch onyx.

Do not use density can be warm or place hot pans directly on the surface.

SEALING & PROTECTION

Onyx should be sealed after installation and resealed as needed to help reduce absorption. However, sealing does not make onyx stain-proof, heat-proof, scratch-proof, or acid-proof. Use coasters, trivets, cutting boards, and protective pads in high-traffic areas, and avoid with colored liquids or strong impacts.

BEFORE YOU CLEAN

Before using any cleaning product, always try on a tiny invisible area for approval on onyx. Sealant reduces the failure or products, could use reactive on sealer finish.

When in doubt, follow the manufacturer's care instructions or contact a stone care specialist before applying any cleaners or treatments.
